

# Hinox CARE KIT

## TECHNICAL OPERATIVE SHEET

---

**Hinox CARE KIT**, wipes kit, specific for degreasing, deoxidation and protection/finishing of stainless steel. **It eliminates and prevents oxidation on stainless steel surfaces.**

**Hinox CARE KIT**, has been developed for cleaning/maintenance of stainless steel 300 series surfaces, suitable for every kind of industry and finishing, for example, brushed, polished, sandblasted, flowered, etc. It can, of course, be used on the stainless steel shutters hardware (stainless steel about 300 series!)

## Hinox CARE KIT contains:

- ✓ Hì DX POWER: deoxidizing wipes
- ✓ Hì DX NEUTRAL: neutralizing wipes
- ✓ Hì FS<sub>1</sub>: finishing liquid
- ✓ Gloves
- ✓ Microfibre cloths

**BE CAREFUL: before using the product read the safety data sheet**

## WAY OF USE

### ✓ MAINTENANCE and RESTORATION

(In presence of excessive dirt or oxidation)

1. Always wear protective gloves provided.
2. Keep the cap to close the product's container in case it is not used for long periods.
3. Use the first wipe **Hì DX POWER** evenly on the surface to treat (**Pickling phase**). Wait 5-10 minutes.

*Note: for best results it is possible to wipe again (with same wipe) on the same area where the product has worked, before moving on to next step. (a)*

4. **Neutralize** by wiping evenly the surface with **Hì DX NEUTRAL**, on the same area where wipe **Hì DX POWER**, was previously used.

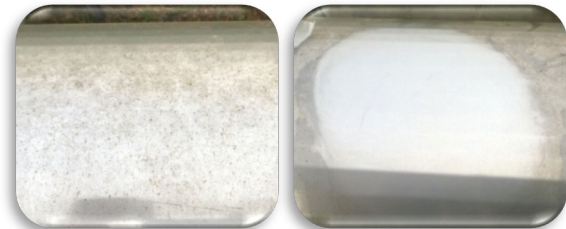

After neutralizing it's suggested to wipe the surface using a cloth soaked with clean water.

5. **Finish/protect** the treated stainless steel surface by applying carefully the liquid product **Hì FS1** using the special cloth provided. Allow to air dry without wiping.

BEFORE

AFTER

BEFORE

AFTER

FINISHED SURFACE

(a) At first use it's recommended to apply the maintenance cycle with product (1), focusing on number and duration of applications on the points of greatest oxidation.

✓ **ORDINARY MAINTENANCE**

(Cleaning and protection, to be use with quarterly frequency)

1. Always wear protective gloves provided.

2. **Finish/protect** the treated stainless steel surface by wiping carefully with the liquid product **Hì FS<sub>1</sub>** using the special cloth provided. (If necessary apply the wipe **Hì DX NEUTRAL** before finisher **WE FS<sub>1</sub>**). Allow to air dry without wiping.

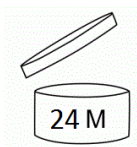

**FINISHED SURFACE**

**IMPORTANT NOTICE**

In case of deep corrosion (absolutely not common on stainless steel), the treatment cannot ensure proper protection/troubleshooting. In this case it's necessary a mechanical treatment in order to smooth out the surface.

**WARINGS FOR THE CONSERVATION AND DISPOSAL MANAGEMENT**

It's recommended to store the kit with containers tightly closed, away from heat or direct sunlight to prevent from drying. If the product is perfectly sealed, its duration may be about 2 years.

Avoid release to the environment. Separate collection helps environment.
